SERVICES OVERVIEW

1 Course Design
2 Technology and Platforms
3 Instructional Strategies
4 Access For All
5 Specialized Services

1A *Create a Purpose:* Clarify learning objectives, help learners associate the relevance of course content to other contexts, and connect the content with learners' goals.

1B *Map a Plan:* Plan out your course from start to finish; show how each week of your semester will meet learners' goals.

1C *Build the Steps:* Support learners' objectives by building activities that lead them to their goals.

2A *Make It User Friendly:* Create a positive and intuitive user experience for both you and learners within Canvas. Design user interfaces that facilitate easy navigation and promote engagement.

2B *Incorporate Tools:* Discover effective educational technology, including AI, to help you help your learners.

3A *Make It Engaging:* Implement active learning strategies, problem-based learning, flipped classroom, reflection, or other engagement techniques to create meaningful interactions with your learners.

3B *Set Up Practice:* Deepen learning by adding opportunities for learners to check their understanding and get feedback.

3C *Strategize Assessments:* Analyze your assessment strategies to determine alternative approaches and create authentic assessments to help learners achieve course outcomes.

3D *Review for Quality:* Send your course for a quality review with the Bruin Benchmark to collect recommendations to refine and enhance.

4A *Add OER:* Help your learners access learning materials by embedding OER strategically in your course.

4B *Make It Accessible:* Get feedback about the accessibility of your learning resources.

4C *Adopt Universal Design:* Review your course to get ideas for making your course effective for all learners.

5A *Full Project:* Combine all the services by designing and developing a whole course to meet quality standards.

5B *Need help with something else?* We offer other services upon request, such as developing a department website, consulting on program outcomes, cross-department collaborations, department meeting demos, job training, or help with changing a course modality.
