e-Portfolio Information for Math 1040, Spring 2013

The assignment you will post in your e-Portfolio will be your term project including the written report and reflective writing.

<u>e-Portfolio Information</u>

For detailed information including a Student e-Portfolio Handbook, video tutorials for each e-Portfolio platform, classes, locations and times of free workshops and other in-person help, visit
http://www.slcc.edu/gened/eportfolio

See your class syllabus for more links to platform specific tutorials and free workshops.

DO NOT e-mail the link to your portfolio to your teacher!

You must link the homepage for your e-Portfolio to your SLCC MyPage account so that all of your instructors can view it. For instructions on how to do this visit
http://www.youtube.com/watch?v=qxN6VXg11Dc&feature=player_embedded#! .

Post only pdf files!

Many types of files (such as docx) cannot be opened when posted. To download a good **free** pdf writer go to http://www.cutepdf.com. Once downloaded, the cutepdf writer will appear in your list of printers. Print your document in the usual way, but choose the pdf writer as the printer. You will be prompted to name and save the new pdf file. This is the version of the file you will post in your e-Portfolio. Note: some word processing software allows you to simply save your document as a pdf file.

It is **highly recommended** that you have a classmate double check that your URL link is correct and that your files can be easily located and opened. Since the ePortfolio assignment is due at nearly the end of the term, your instructor will only have time to check for it once. Be sure link is correct, the project is actually there, it is in pdf files that can be opened, and that it is correct.

Your project and reflection must be posted in your e-Portfolio and linked in your MyPage account by **30 April 2013.**
