Course Description

This course is designed to apply and evaluate learning in the Advanced Manufacturing program. It prepares students for employment in the advanced manufacturing industry and serves as a link between classroom and apprenticeship. Students choose an approved apprenticeship or a capstone project to fulfill this requirement.

Course Learning Outcomes
Collaborate with the program manager and host company to establish a set of objectives for an apprenticeship or capstone project that apply the knowledge and skills acquired through the program
Complete an apprenticeship or capstone project
Assess and report how the learning objectives were met through completion of the apprenticeship or capstone project

COURSE MATERIALS and COMMUNICATIONS: This course will make extensive use of the SLCC Canvas online management system to provide course materials, communicate official announcements, serve as a repository for course specific information, and channel communications between students and the instructor. Be sure to set your Canvas preferences so that notifications and updates reach you in a timely manner. If you are new to the Canvas system, there are various options available for orientations and training available.
