Course Description

Music Mixing Techniques is designed to teach intermediate to advanced concepts in editing and mixing of digital multitrack audio. Students will be given the opportunity to work in a commercial style recording facility and learn to use equipment and methods that are consistent with current recording industry practices.

Prereq: MUSC/COMM/FLM/THEA 1515.

Semester: Spring & Summer

Course Student Learning Outcomes

- Student understand the signal flow of equipment in a recording studio's control room including analog and digital patching of equipment, analog to digital and digital to analog convertors and the mixing console.
- Students are able to demonstrate intermediate and advanced editing techniques for working with and editing multitrack audio.
- Students are able to demonstrate technical and creative uses of digital and analog signal processors such as equalizers, dynamics, reverb, delay and modulation

effects.

- Students are able to use mixing, editing and processing of audio to create commercially competitive recordings from studio and live multitrack recordings.
5. Students can deconstruct commercial recordings and be able to make assertions as to production methods of recording, editing, processing and mixing used on said recordings.

Course Prerequisites

Basic Audio Production or instructor approval

Communication Plan

I strive to respond to your emails and text messages within 24 hours, except on weekends and holidays.

I will usually offer feedback on assignments within 24 hours. Larger assignments may require 3-4 days.

Keys for Success (how to succeed in the course)

Mixing music, just like any other creative pursuit, requires plenty of practice. Plan on spending plenty of time learning how to use the mix tools available to you, and then putting those tools to work in real-world mixes. You won't become an excellent mix engineer after one semester; rather mixing is an intricate skill that requires several interrelated skills to be developed and applied holistically. Your goal in this course should be to gain an excellent technical knowledge of the mix tools you will be using, and to begin your journey toward developing a musical application of those tools in the mixing process.
