

Nurs Pharm IV

NRSG2420 501

Course Description

Utilizing evidence-based practice, interdisciplinary collaboration, and technology to correlate concepts of pharmacokinetics, pharmacodynamics, medication safety, administration and interactions related to prototype drugs, corresponds to disease processes concurrent with NRSG 2400. Fourth in a series of Four.

Pre-Requisite(s): Completion of prior semester courses per established curriculum plan.

Semester(s) Taught: All

Course Student Learning Outcomes

- Explain the Nursing Role related to implications of Pharmacology through the application of the Nursing Process with emphasis on medications used for increasingly ill patients.
- Describe the role of the professional registered nurse in drug administration related to lifespan issues, transcultural beliefs; safety and the prevention of medication errors.
- Prioritize appropriate patient teaching regarding drug therapy that considers developmental stage, age, culture, and spirituality.

Communication Plan

Example language:

- I will respond to email within [insert your timeline]. I will offer feedback on major assignments within [insert your timeline]. The best way to contact me is via the Canvas Inbox, as I will prioritize this email over other modes of communication.

- In this course I will be posting interactive announcements which will offer specific opportunities for class questions and extra credit every other week.
- Additionally, I will be participating in the discussion forums with you to share my perspective within the discipline and to offer some nuances of interpretation that may not be present in your textbook.
- Lastly, we'll be holding small group Q & A sessions, where we can learn from our peers (and faculty) on some of the more difficult units within the course.
