Utah Statewide Amendments to the IPC

Boiler Operator's Guide – 4th Edition, Anthony Kohan

NFPA 13D Standard for the Installation of Sprinkler Systems in One- and Two-Family Dwellings
and Manufactured Homes

MATERIALS REQUIRED EACH CLASS PERIOD:

IPC Code book and amendments (Commentary is not permitted for use on any test or exam)

IFGC Code book (Commentary is not permitted for use on any test or exam)

IMC Code book (Commentary is not permitted for use on any test or exam)

Boiler Operator's Guide

NFPA 13D

Calculator (Recommended: TI-30 or equivalent. Graphing or programmable calculators are not permitted. Construction Master or other similar calculators are not permitted. Calculators on cell Phones will also not be allowed to be used in the classroom.)

Pencil/Pen

Highlighter

Notebook

MATERIALS REQUIRED FOR EACH LAB CLASS PERIOD:

Students are expected to bring their own tools and safety equipment to lab classes. The following is a list of minimum tools and protective equipment that students must bring to the lab:

Safety Glasses
Leather Gloves
rags
Tape measure
Framing square
Copper reamer
PVC reamer
Torch and appropriate gas for soldering and brazing copper pipe
Pipe cutter capable of cutting up to 1 ½" copper pipe
Cutter capable of cutting up to 1 ½" PVC
Channel Locks (at least 1 pair, 2 pair preferred)
Calculator

Students who do not bring all of the required tools and safety equipment will not be allowed to attend the lab and will receive a 0 (zero) for the assignment and be marked as absent for the night.

Students are also required to dress appropriately on lab nights. This means long pants, shirts with sleeves and closed-toed shoes.

ELECTRONIC DEVICES:

Electronic devices are not permitted to be used in the classroom. Please turn off all electronic devices. Cell phones are permitted to be in the vibrate mode. If it is necessary to answer a call, please step out of the classroom and make it as brief as possible. Extended phone calls may result in reduction of clock hours.

COURSE DESCRIPTION

This is an introduction to water heaters and appliance venting, fuel gas piping and control devices. Applied mathematics for plumbers, study of the applicable codes, roof drains and blueprint readings will be covered.

PREREQUISITE – PLI 2310 WITH A GRADE OF C OR HIGHER

COURSE GOALS &/OR LEARNING OBJECTIVES

At the conclusion of this course, the student will demonstrate:

1. Satisfactory general understanding of the International Plumbing Code chapters 6-9 and their application in the plumbing industry
2. Satisfactory general understanding of the international Fuel Gas Code chapter 4 and its relevance to the plumbing industry
3. A basic understanding of boilers and their operation to include connections, controls, safety, pumps, motors, and water chemistry and treatment
4. A basic understanding of hydronic piping and related code requirements
5. A basic understanding of code requirements associated with residential sprinkler systems

This knowledge will be demonstrated by a final end of semester competency exam on which the

student will be required to score a minimum of 70%.

COURSE REQUIREMENTS

- **CLASSROOM EXAMS** – Unit tests and exams will be given periodically throughout the semester to assess the student’s learning and retention of the course material. There will be a final competency exam on which the student is required to score a minimum of 70%.
- **Preparation** – Students should expect to spend 5 hours each week in class and approximately an additional 5 hours of study/homework time each week to be successful in this course.
- **Lab requirement** – Students will be expected to attend a minimum of two labs during the semester. These labs will be scheduled by the instructor.
- **On the Job Training** – It is expected that students are employed in the plumbing industry and are working full-time while attending school. It is mandatory that students hold a current valid Utah Apprentice Plumber license while enrolled in school. Students without a valid license may be administratively withdrawn from class.
- **ATTENDANCE** - As per the requirements set forth in 29 CFR 29.5 Standards of Apprenticeship paragraph (b)(4), each apprentice must successfully complete a minimum of 144 hours of related and supplemental instruction each year of Apprenticeship (72 hours each semester). In our efforts to accommodate the demanding schedules of the majority of the Apprentices registered and enrolled at Salt Lake Community College, we are offering each of our courses for a period of 75 hours each semester (2.5 hours for each of 30 evenings). This allows the Apprentice the flexibility of missing up to and including 3 class nights. The enforcement of this policy is the responsibility of each instructor. Instructors are required to take attendance each evening. Individual Students will be held responsible for ensuring they have sufficient clock hours to successfully complete the course. Salt Lake Community College will offer up to an additional 6 clock hours at the end of the semester (usually on a Saturday) for those students who need to “make-up” time. There will be an additional cost of \$35 for each block of 3 clock hours, payable on the day of the class. Salt Lake Community College will only offer these additional hours if there is sufficient students to offset the costs associated with providing the training (a minimum of 10 students). Students requiring make up hours must contact the Apprenticeship Office as soon as possible. **Students are not allowed to “make-up” clock hours or labs by attending classes for which they are not registered.** Students with insufficient clock hours will not be permitted to sit for the final Competency Exam at the end of the semester. They will receive a failing grade and be required to re-take the semester course prior to moving forward in their apprenticeship.
- **COMPETENCY EXAM** – The Utah State Licensing Board has mandated a final end of semester competency exam which will be administered on the **second to last** day of class. This competency exam may include any information covered in the approved curriculum outline for the individual program. This will be a 60 question, Multiple-Choice and True/False, exam which must be completed in 2 hours. This exam will account for a major portion (30%) of the final grade awarded in the class. Students are required to bring a picture ID and a #2 pencil to this exam. Students without these items may be asked to leave and receive a failing grade. Additionally, the following materials will be allowed to be used on the competency exam: a 2021 International Plumbing Code (**Commentarys are not allowed**); International Fuel Gas Code (**Commentarys are not allowed**); a calculator (Recommended: TI-30 or equivalent. Graphing or programmable calculators are not permitted. Construction Master, Electrical Pro, Project Master, or other similar calculators are not permitted. Calculators on cell Phones will also not be allowed to be used in the classroom.).

**This exam will account for 30% of the final grade awarded for the class. If the student scores less than 70% on the exam, the score will be recorded as a 0 (zero). If the student scores a 70% or higher, the earned score will be calculated as 30% of the final grade.

- **GRADING SCALE AND POLICY** – Grades will be awarded based on the following percentages:

Homework: 20%

Quizzes: 25%

Midterms: 25%

Comp Exam: 30%

The final grade will be issued according to the following table:

A 94 – 100%

A- 90 – 93%

B+ 87 – 89%

B 84 – 86%

B- 80 – 83%

C+ 77 – 79%

C 74 – 76%

E 0 – 73%

Students receiving an E grade will be issued 0 clock hours for the course.
